

IBM POWER9

A CLEAR PATH FORWARD WITH MAXAVA MIGRATE LIVE

As IBM POWER9 hardware reaches the end of its standard IBM support lifecycle, businesses still running on this platform face several critical risks.

Security Vulnerabilities

Inability to run the latest IBM i operating systems, exposing servers to additional cyber threats.

Increased Support Costs

Without standard IBM support, maintenance can become more expensive.

Increased Downtime

Server failures could take longer to resolve due to harder-to-source components, extending unplanned outages.

Operational Inefficiencies

Older servers may lack compatibility with modern applications and software, impacting compatibility and performance.

MAXAVA MIGRATE LIVE™

Whichever option is selected, Maxava's Migrate Live offers a seamless migration path, reducing risks and ensuring zero downtime. Key features include:

- **No Downtime Migration:** Eliminate business disruptions typically associated with migration by leveraging Maxava's HA replication technology.
- **Temporary Licenses:** For up to 3 months, use Maxava HA on two named servers (the on-premise POWER9 and the chosen upgrade path).
- **Dedicated Project Management:** A Maxava Project Manager will guide your teams through the migration, ensuring alignment with timelines and goals.
- **Multiple Test Cycles:** Ensure your migration is a success with the flexibility to perform multiple test cycles.
- **Expert Support:** Work with a highly professional and dedicated team to ensure a smooth transition to your new platform.

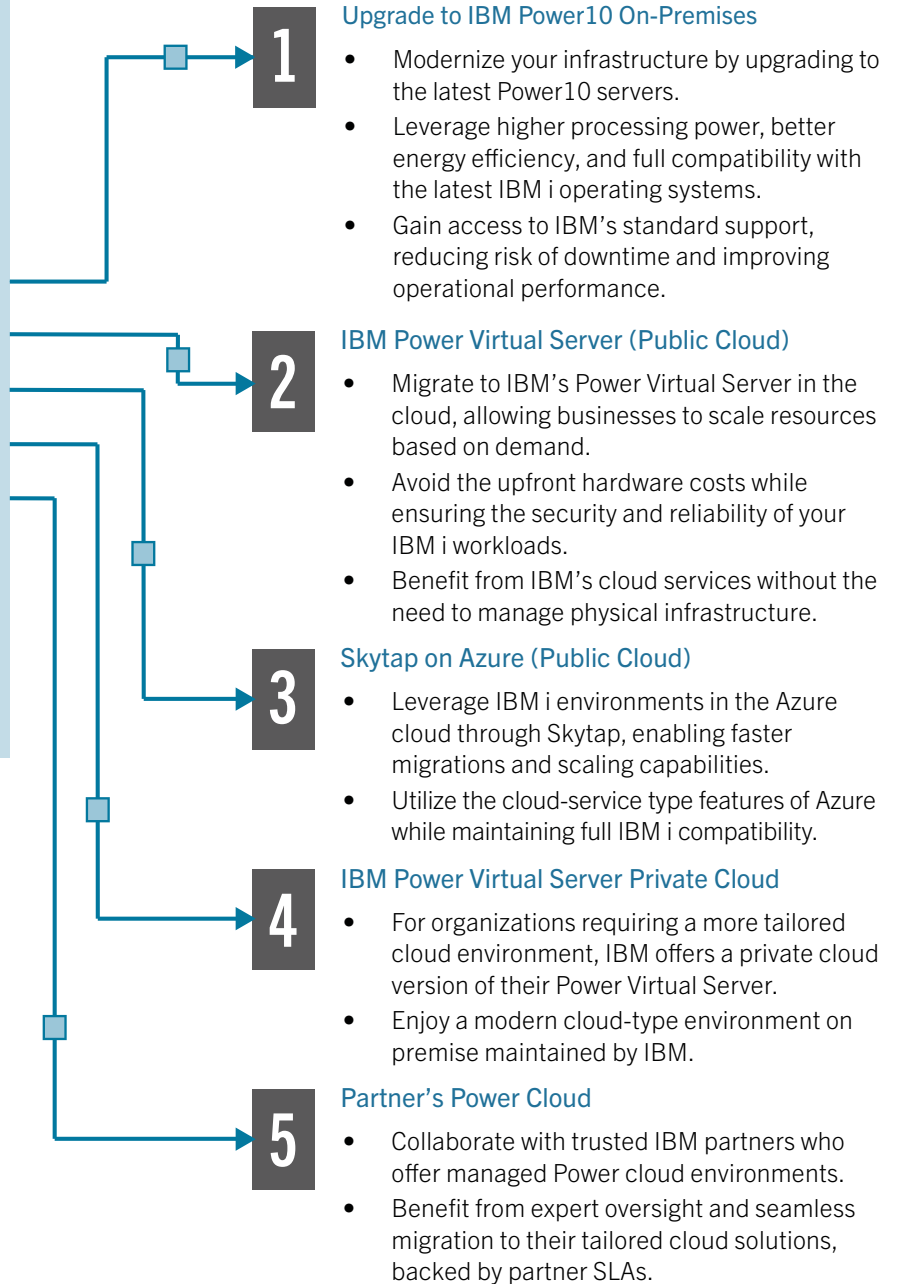

Conclusion: A Clear Path Forward with Maxava Migrate Live

Maxava Migrate Live simplifies the migration process, providing a risk-free path no matter which option you choose:

- Zero downtime migration, ensuring continuity of business operations.
- Seamless transition to Power10, IBM's Power Virtual Server, Skytap on Azure, or a Partner's Power Cloud.
- Expert guidance and project management throughout the migration process.
- Flexible test cycles, maintaining data integrity through the migration.

Upgrade Options for IBM POWER9 Users

Businesses currently running IBM POWER9 hardware have several options to transition to newer, supported systems:

Contact Maxava or your local business partner today to discuss your requirements.
